

Postdoctoral Fellow: Transdisciplinary Institute in Applied Data Science (TRIADS)

The Transdisciplinary Institute in Applied Data Science (TRIADS) at Washington University in St. Louis is seeking applications for a new Postdoctoral Fellows Program for the 2023-2024 academic year. The appointments are for one year with the possibility of renewing for a second year contingent upon satisfactory performance, and the anticipated start date is July 1, 2023. Fellows will receive a salary, benefits, as well as an annual budget to pay for travel costs and research expenses.

The mission of TRIADS is to support transdisciplinary research programs that harness advanced methods and tools in the service of better understanding our world and addressing urgent social issues. We are looking for fellows who are interested in researching critical issues facing society in a collaborative way, including both methodological and applied researchers. We take a broad view of data science and encourage applicants from all research traditions to apply. Skills of interest include, but are not limited to, novel methods of data collection, data analysis, algorithm design, theoretical modeling, and applied quantitative or qualitative analysis in relevant substantive domains.

Fellows will pursue their own research agenda in a vibrant interdisciplinary intellectual community and connect with mentors in multiple fields. In addition, fellows will be responsible for participating/leading TRIADS activities and honing their professional skills through constructing a new curriculum of workshops and short courses for our community. We are looking for self-motivated scholars who will contribute new ideas and actively seek collaborations with other fellows, faculty, and students across all schools at Washington University.

A core value of TRIADS is to create an open and inclusive intellectual community. We strongly encourage applications from researchers with diverse backgrounds, experiences, and identities. You can learn more about policies to help postdocs from all backgrounds thrive at Washington University in St. Louis at: <https://postdoc.wustl.edu/policies-benefits/>

Qualifications

We are looking for early-stage scholars who want to work in an inclusive, collaborative, and interdisciplinary research environment. All applicants must have a doctorate before their appointment begins, but we are open to many fields of study. Applicants may have training in any number of relevant areas including the social sciences, computer science, statistics, public health, or the digital humanities.

Application Instructions

We will begin reviewing applications on April 15, 2023, and will continue accepting applications until May 15. Early applications are strongly encouraged.
