

JENNIFER HUBERTY PHD
RESEARCHER

FIT MINDED, INC.

Role: Volunteer Research Intern with Bend Health under the leadership of Dr. Huberty at Fit Minded; Remote

Position: Part-time (minimum 10 hours per week) for a minimum Summer or Semester commitment

Start Date: Applications accepted on a rolling basis; May/June 2023 start

About Fit Minded, Inc. DBA Dr. Jennifer Huberty

Dr. Huberty is a revered and innovative scientist with over 20 years of experience. She is an entrepreneurial trailblazer in the digital healthcare and life sciences space. As the former Head of Science for Calm and a Fractional Chief Science officer for several digital health startups she is an expert in understanding and applying the intersection of business and science, building scientific strategy, developing partnerships and collaboration opportunities, creating, and implementing processes for external partnerships, growing science for start-ups, and communicating science to a number of audiences. Learn more [here](#).

Position

Dr. Huberty is looking for a volunteer research intern to come work with her at Fit Minded, Inc under her role as Fractional Chief Science Officer at [Bend Health](#). Dr. Huberty has built a small team (2 research scientists) and is looking for an intern to help support the science team. **This position is for doctoral students looking to gain experience in order to position themselves for a job in industry related to mental health in youth.** You will work closely with and be mentored by the research scientists at Bend Health and Dr. Huberty. The position provides the opportunity to learn how to navigate science in industry and includes conducting literature reviews, competitor company reviews, designing research studies, assisting with analyzing and writing data for publications, and assisting with writing grants.

Candidates

You are passionate about science and mental health using digital approaches and know that you want to work in industry but need experience. You have a desire to learn about applying science to business. You are a problem solver and not afraid to ask questions. You are able to make decisions after doing your due diligence.

Qualifications

You are currently enrolled in a doctoral degree program in social or behavioral sciences, clinical psychology, public health or related fields. You have experience in digital health/technology and behavior change and are interested in mental health. You are beginning to establish yourself as a scientist and actively publishing papers.

Preferred Qualifications

Experience with data analysis (quantitative and/or qualitative)

How to apply

Please send an email stating why you are interested in the position and your resume/CV. We will be reviewing applications immediately for a summer start date. jennifer.huberty@bendhealth.com
